Art Unit: 1711

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 20-23 and 27-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goto (Japanese reference 05295327) in view of Banning (6,018,005).

3. Goto discloses polish comprising diurethanes of toluene diisocyanate (TDI) (see abstracts) and C30-C70 alcohols, such as Unilin 425 (see page one of translation). He shows an NCO/OH ratio of 1/1 in the example of page one of the translation). He differs from the claims by not disclosing ethoxylated alcohol.

4. Banning shows diurethanes of Unilin 425 (see example 1) for use with other waxes (col. 2, lines 15-16) in inks. In other examples, he shows that ethoxylated alcohols (Unithox products) can be used equivalently to non-ethoxylated alcohols in waxy products (see examples 14 – 20).

5. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use alkoxylated alcohols in the polish of Goto because Banning shows diurethanes of them to be equivalent to non-alkoxylated alcohols in waxy compositions.

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
